Testimonies from Oracle Professionals who obtained their OCA 10g DBA after attending our boot camps.

Muligande Jean Aime Cliff (MTN Rwanda)

At the end of 2008 I asked GOD to help me to get my OCA which has been my dream since 2007. In March/2009 a colleague of mine who works in Customer Care received an email from DigitalBrain via HR Department, as he knows that I deal with Oracle Databases he forwarded me the email. I read the content of the course I found it very interesting and applying to my requirements. I decided to attend the Boot Camp. The first Exam 1Z-007 I scored 100 and the second one 1Z0-042 the time I submitted the exam the print-out mentioned 100 as score. I could not believe my eyes but that is what has happened to me through DigitalBrain. Today I'm Oracle Certified Associate and GOD realized my dream through DigitalBrain. Today I can say thanks to DigitalBrain and I recommend DigitalBrain to anyone who has a touch on Oracle and who wants to be certified. DigitalBrain will make it happen.

Brenden Kachenje (Hits-Tanzania-Telecommunication (GSM) Company)

I'm Brenden Oswin Kachenje, working as the value added services manager from the technical side in HITS-Tanzania, one of the GSM companies in Tanzania.

It sounded a nightmare to me when I first heard of DigitalBrain like a month ago via a work mate, I took trouble to visit their website and established the communication link with their customer service department.

The best part of it is when I was told about the April OCA boot camp by their customer service representative, I could not imagine how comes the 4 months syllabus course can be scaled down to two weeks as per Oracle University requirements? !!How comes an expensive course in town is turned to be the cheapest one?!!

This was a deal to me but I couldn't believe if this is going to happen in Tanzania, so I created a self set-back and had to explore about the

trainer's competency. I received the shock of my life; the guy possesses OCA & OCP DBA, OCA & OCP Developer, CEH, and CHFI which is not common in Tanzania.

No more worries I jumped in a class, the course was lovely, the trainer was competent, text books and refreshments were available, and I witnessed the transfer of Oracle knowledge from the trainer to my brain, you can imagine with the limited time for reviewing I have due to work ties I scored 98% and 97% for the two exams and become the Oracle10g OCA DBA. Maybe I am dreaming, but this has happened and is happening through DigitalBrain!!!!

I have joined their world for my international professional recognition requirement.

What other students from around the world are saying after attending our boot camps training

Li Kezhuo from China,
All what I can say is that...Digitalbrain has made my world be real and alive. I can recommend their boot camp to any one who wishes to jump from dreaming to reality.

Andrew Kyalo from Kenya
The first time I joined their boot camps I could not believe if this kind of professional materials and competence can be found in Tanzania. I am now going back to Kenya with all that I want from DigitalBrain

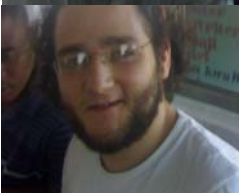

Helene Leforestier from France
Hi, am Helene from France, I enjoyed my training with Digitalbrain.They have made my world as simple as digital.

Irlen Janssen from Netherlands
As IT professional you need to be trained by certified, qualified and experienced professional. For the two weeks that I have been with DigitalBrain, I have how they make IT happens.

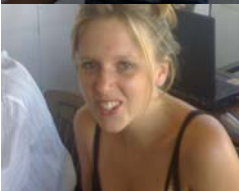

Jimmy Kinuthia form Kenya
I have experience very interactive lectures, practical examples and live knowledge impartation from instructor to my brain. Now am going back to Kenya with my mind being digital. Thank DigitalBrain

Joseph Tixier from France
I recommend DigitalBrain to all international students.

Solomon Nganje from Uganda
Asante sana DigitalBrain for the world class training and knowledge I have acquired for these two weeks.

Marine Francois from France
The class was good, instructor was very knowledgeable and the class materials were fantastic. Thank you DigitalBrain

Why Become an Oracle Certified Professional?

The demand for professionals in information technology (IT) is high, and the competition for jobs is intense. Individuals, experienced or new to the profession, need to know what skills make them attractive to employers. Employers look for ways to distinguish employees and prospective employees who have the solid foundation of skills needed for effective performance. The Oracle Certification Program helps the IT industry make these distinctions by establishing a standard of competence in specific job roles.

An Oracle Technical Certification is a valuable, industry-recognized credential that signifies a proven level of knowledge and skill.

The Oracle Certification Program can give you a distinct advantage. An Oracle Certification demonstrates that you have a solid understanding of a job role and the Oracle products used in that role. Being an Oracle Certified Professional can help raise your visibility and increase your access to the industry's most challenging opportunities.

Still not convinced?

See below how thousands of members have testified to the value of the Oracle Certification Program.

- 97% said they have benefited from certification.
- 96% would recommend the program to a professional colleague.
- 89% said they gained more confidence in their Oracle expertise after becoming certified.
